

JAVIER SÁNCHEZ LANCHA

Backend Software Engineer

Professional Summary

Backend Software Engineer specialized in Java and Spring, with experience building enterprise platforms and B2B/B2C eCommerce solutions. Currently contributing to the development and evolution of a large-scale SAP Commerce Cloud platform in the Real Estate sector, designing business-critical features, integrations, and complex business processes. Experienced in production environments, incident resolution, and collaboration with business stakeholders, QA teams, and end users. I leverage AI tools to accelerate technical analysis, debugging, and documentation while maintaining engineering quality and ownership.
